

A.A. Papageorgiou  
ARCHITECTS & ASSOCIATES INC.

A.A. Papageorgiou Architects and Associates was established in 1984 in Johannesburg, South Africa. With decades of experience, we provide comprehensive service to a wide range of clients around the world, including private individuals, public and private companies, developers, and government agencies.

Our knowledge of building typologies, construction methods and materials enables us to create architecture that considers the user and environment. Our staff are skilled architects and technologists who are dedicated and enthusiastic about creating innovative and sustainable design solutions for each project.

# Π INDUSTRIAL

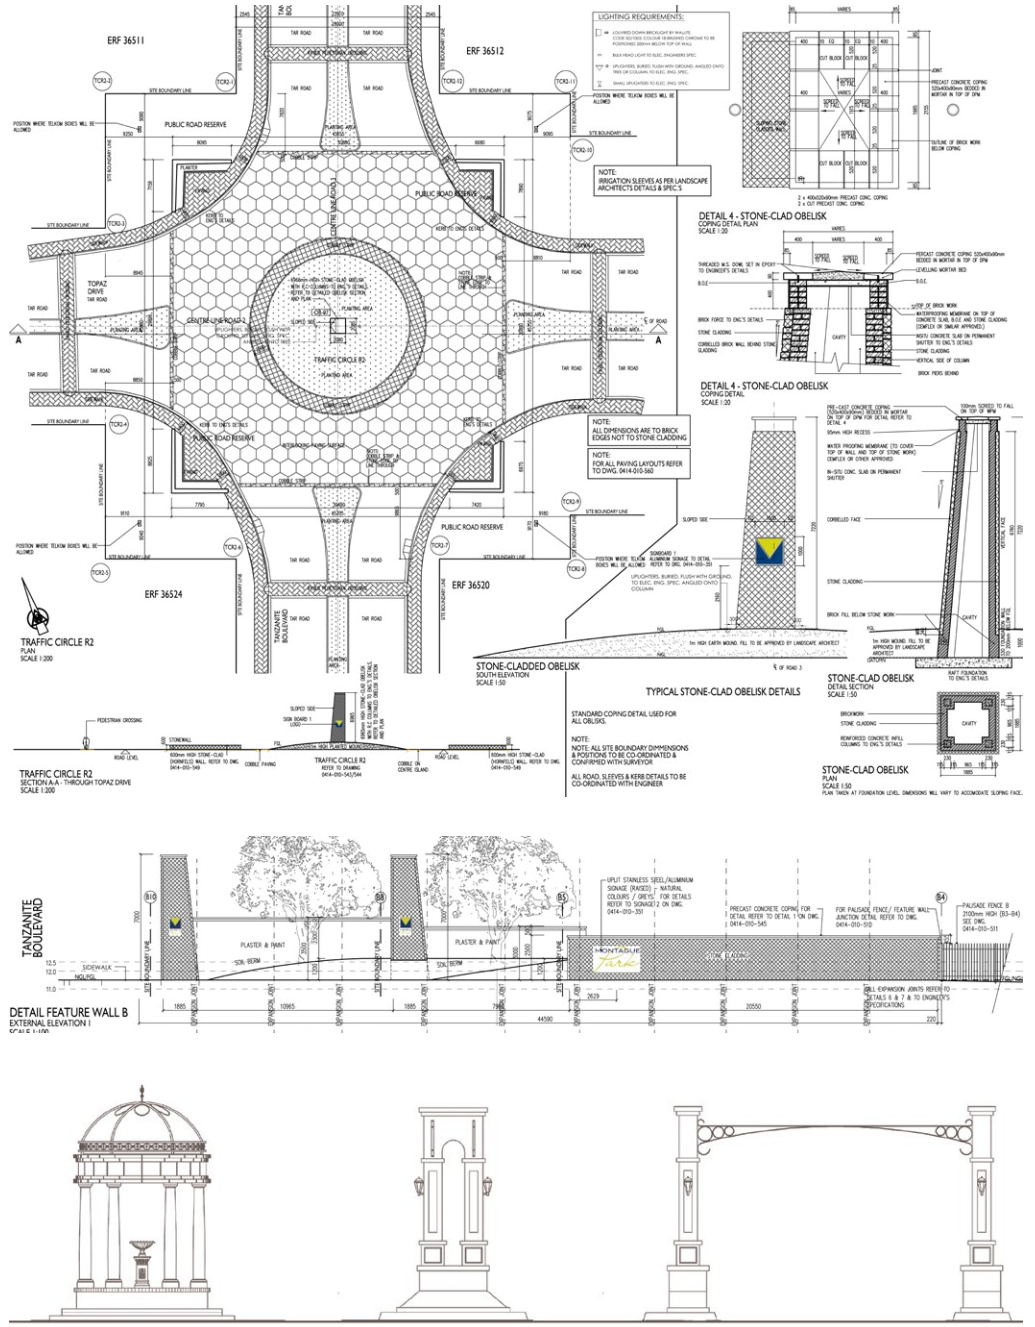

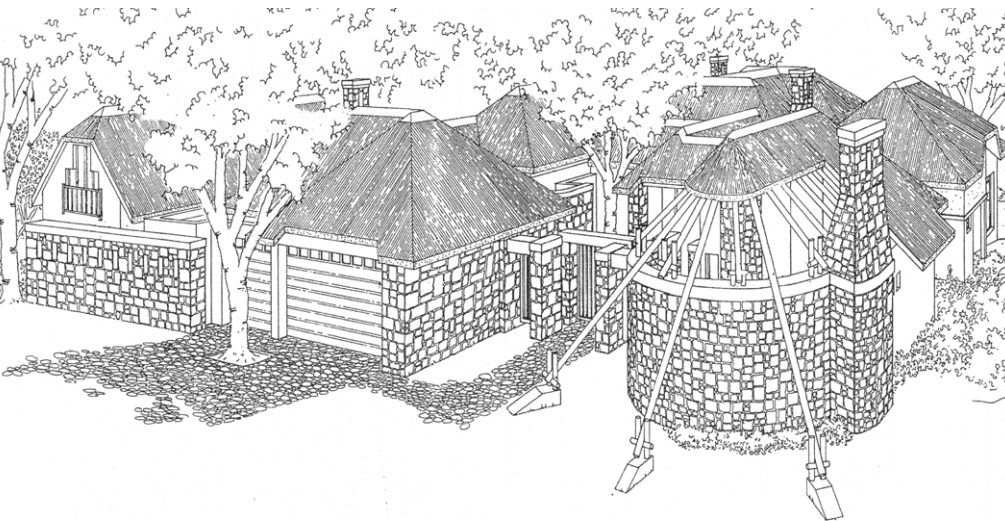

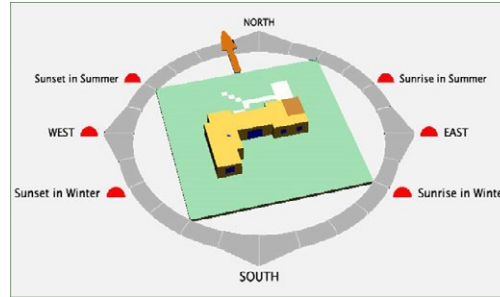

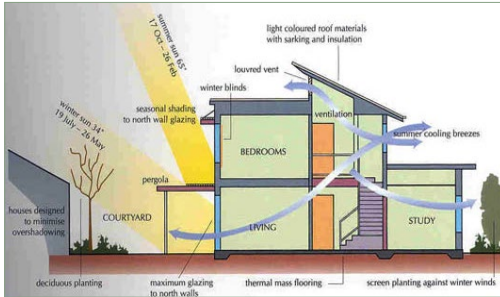

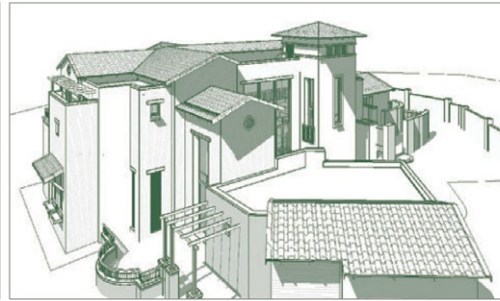

The team has been involved in the layout of urban schemes with a focus on integrating natural features, structures and urban furniture into the design, establishing contextual relationships between surrounding buildings and urban spaces.

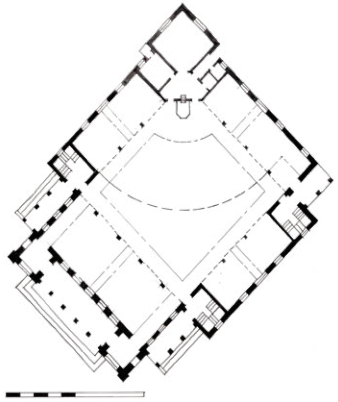

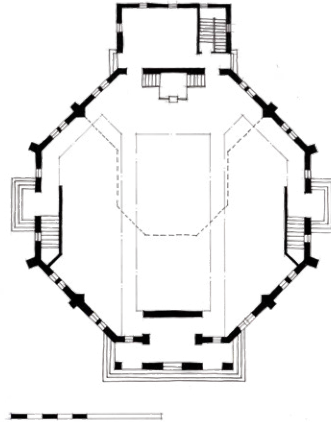

Green building involves designing and constructing environmentally responsible and resource-efficient buildings throughout their life cycle. Each client, area, building typology, and budget suggest a different solution. The team prioritizes an early integration of green building interventions to create sustainable design that responds to the environment.
